Aim: To include icons, images, fonts in Flutter app

Theory: Flutter allows the integration of icons, images, and custom fonts to create visually rich user interfaces. Icons can be added using built-in Material Icons or external packages like `font_awesome_flutter` and `flutter_svg` for more design flexibility. Images can be loaded from assets or online using `Image.asset` or `Image.network`. Custom fonts can be added by placing font files in the assets folder, declaring them in `pubspec.yaml`, and applying them using the `TextStyle` widget.

Output:

Conclusion:

Flutter provides an efficient and flexible way to include icons, images, and fonts, which enhances the overall look and feel of an app. These visual elements help in creating a more intuitive, engaging, and personalized user experience.
